PROFESSIONAL SUMMARY

Computer Science and Mathematics student at UVA (GPA: 3.9) with extensive knowledge of data structures, algorithms, and software development methodologies. Skilled in Python and Java programming with experience in unit and integration testing techniques. Proficient in Git and agile practices; passionate about mathematics, statistical modeling, software engineering and complex problem solving in real-world settings.

SKILLS

Databases: Relational Databases (Structured Query Language), SQLite

Programming Languages: Python, Java, C, SQL

Frameworks & Libraries: JUnit, Gradle, Hibernate, JPA, Django, JavaFX, Mockito

Tools & Platforms: Git, GitHub, Make, LaTeX

Concepts & Methodologies: Object-Oriented Programming (OOP), Unit Testing, Agile Development

Software & Utilities: Excel, PowerPoint, Word, Outlook, Slack, Teams, Discord

EDUCATION

University of Virginia, School of Engineering and Applied Science

August 2023 – May 2027

BS in Computer Science

- Relevant Coursework: Data Structures, Algorithms, Software Development Essentials, Computer Systems Architecture, Discrete Mathematics, Cybersecurity, Software Engineering

BA in Mathematics, Concentration in Probability and Statistics

- Relevant Coursework: Probability, Linear Algebra, Differential Equations, Real Analysis, Complex Analysis, Abstract Algebra

Cumulative Grade Point Average: 3.9/4.0

EXPERIENCE

Advanced Data Structures and Algorithms Teaching Assistant

August 2025 – Present

UVA Department of Computer Science

Charlottesville, VA

- Tutored and assisted class rooms of 100+ students by leading review sessions, answering questions, and clarifying complex mathematical/computational concepts.
- Graded homework assignments, quizzes and exams providing personalized feedback to students and offering resources for improvement.

Discrete Mathematics Teaching Assistant

August 2024 – December 2024

UVA Department of Computer Science

Charlottesville, VA

- Collaborated with faculty to design challenging exam questions ensuring consistent levels of difficulty and subject matter coverage.
- Guided students and graded assignments on advanced mathematical concepts including set theory, mathematical induction, boolean algebra, and combinatorics.

PROJECTS

Hoo Wants Some (Heroku Deployed Web App)

Aug 2025 – Dec 2025

- Developed a full-stack Django web application within a team for UVA students to promote sustainable item exchange, inspired by Depop and Facebook Marketplace.
- Implemented secure Google OAuth authentication with django-allauth, user profiles, in-app messaging, and role-based moderation features.
- Deployed on Heroku with a PostgreSQL database and Amazon S3 for media storage, supporting image uploads, search, and filtering.

EXTRACURRICULAR INVOLVEMENT

Affiliations: First Year Players (Assistant Director, Social Chair, Alumni Chair)

Achievements: Deans List (All semesters)
